

Activity 18 | Aspirations (30 min)

(activity) All the children in the series talk about their hopes and dreams for the future. For some of the children, the fact that they cannot access school will mean they won't be able to achieve their goals. In this activity, students will think about different jobs and what they would need to do to get these jobs. Cut up the cards on **worksheet 17** and give each student one. Ask each student to think of what they would need to study or what skills they would need to develop in order to do this job. How many of the jobs would you be able to do without any schooling?
